Mo,

It was good to meet you yesterday. I think the meeting went well and I hope to hear from TMO next week with clarity on what to include and what not to include in the project.

Attached is the latest recommendation from Max Fordham on the M&E value engineering. It includes both the gas boiler option and also the adjustment to the cold water system that is yet to be agreed by TMO (due to loss of storage water in power outage). TMO are considering this on Monday and even if they decide against it the splitting out of the hot water works and cold water should be easy enough.

Please can you advise on the price difference this option would offer.

Kind regards

Philip

Philip,

It was good to meet you yesterday, the meeting was a good step in the right direction for the project.

I have put together the lists of adds and omits for the 4th M&E VE option as discussed at yesterdays meeting. It should be this option that is presented to the TMO board on Monday.

If you have any questions please don't hesitate to give me a call.

Kind regards,

Andrew
