Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was plotted against the number of trials for each condition. The number of correct responses increased with the number of trials for all conditions. The number of correct responses was highest for the condition with the highest number of trials (10 trials) and lowest for the condition with the lowest number of trials (2 trials).

**Subject:** High Rise Forum

Good afternoon,

I have been asked to book a meeting with yourself and Tri-borough Directors and Senior officers regarding the above subject.

I would appreciate if you can give me available dates and times so I can book this in.

Many thanks,  
Dega
