Subject: RE: EXT || RE: Grenfell Tower

Stuart,

In discussion with Harvey on site I confirmed that corrosion has been found on other risers within Grenfell and would the new network being installed subject to agreement be sufficient if a full replacement was required , I am advised by the engineer who carried out the survey that the corroded network is within the fabric of the building hence my question to Harvey, in answer to your question yes it needs to be considered.

NG engineers and I intend to return to Grenfell to review the corrosion.

Cerianne confirmed on today's T/C call that a site meeting had been arranged for today with the TMO and that a buyout was being considered.

Pat

Are you looking for us to consider a proposal for full riser replacement in the block?

Regards

Stuart Stevens

Stuart,

FYI.

The risk score from the recently carried out LC 21 survey has now been confirmed as 596,026.

As you are presently liaising with the TMO this location will not be subject to HAZOP.

I will update NS accordingly.

Regards
