Mary

I suggest that a meeting is arranged ASAP as you can see below there is once again an unreasonable amount of noise we are having to field around this site.

Please arrange an urgent time to come and speak with the TMO regarding what you are planning

Thanks

**Anthony Cheney**

**Importance:** High

Hi Anthony & Nicola

Please see below and attached.

When we met with NG in late March they raised the possibility of staying on site at the end of this phase of their work and undertaking works in the remaining flats to connect these to the new riser. My recollection is that we were concerned that this would not be well received and in particular that residents had not been consulted – and our initial view was that it would be preferable to go off site completely, consult residents properly and then come back with a proposed new schedule of work and timeframe for these further works. Is this also your understanding?

Have you had any further contact with NG since our meeting? Have we been provided with copies of this correspondence? We will need to brief Laura and I would be grateful for any update you have on this

Please advise

Regards

Janice

Dear Ms Johnson

Please find attached a letter sent to all residents of Grenfell Tower recently. It seems that the National Grid is seeking to enter every flat and to undertake works of which it appears the TMO has little or no knowledge. This has only come to light following complaints from individual residents, the Grenfell Leaseholders' Association and the disastrous works carried out at one flat where asbestos was disturbed and contaminated the whole flat, despite National Grid claiming that they knew where all the asbestos was located and had trained their operatives accordingly. This was clearly not the case.

Given the money spent on the Grenfell Tower refurbishment and all the disruption that residents experienced during that very long project, I find it frankly outrageous that National Grid can – apparently quite legally – demand entry to all the flats and propose all these works without even bothering first to liaise with the TMO or the Council as the freeholder, cause residents major worry and then carry out works that damage the integrity of the newly refurbished building.

Can you please advise what steps the Council proposes to take to deal with this issue; ensure that National Grid have the decency to treat our residents with respect; do not ever again put families' lives at risk through wanton damage to asbestos-bearing materials; and have in place a clear complaints and compensation process, not just for residents but also for the building's freeholder?

I can't think in all my 34 years on the Council of anything that has gone on for so long in such an irresponsible manner and caused such concern to residents.

Cllr Judith Blakeman
