Hi Paul/Rob

Attached is the first draft of Warrington Fire Desktop activity on RS5000.

It looks positive from first quick reading.

Just as a reminder, the proposed build ups are as discussed with Dave White. We discussed the most common build ups that best represent NHBC projects.

I'll put some time in the diary Paul to discuss more fully.

Kind regards

Debbie Berger

Debbie,

Please find attached the draft report.

It still needs to be reviewed and approved, but should give you an idea about how we prepare such an assessment.

What would be really nice is some schematic drawings like the ones in the BRE report, for the tested and alternative constructions.

Kind regards,

Frans

Morning Frans

Hope you had a good weekend.

How are you getting along with Celotex desktop study for RS5000?

Kind regards

Debbie Berger

Subject: RE:

Good afternoon Debbie,

I returned this Tuesday morning, which already seems ages ago.

I have seen your report, and found the damage to the insulation larger than expected, which means I have to re-set myself in evaluating the alternative designs.

I also need to think about how to judge the change from the tested MgO boards to the CalSil boards in your proposals, but that could be done by using standard rules for substrates.

Have you made any progress in getting a formal purchase order? I need it to progress your project from 'quoted' to 'order won' and be able to assign a formal project number.

I will leave for a factory audit in the US tomorrow, will be back on Wednesday, so I hope to be able to tell you more end of next week.

Kind regards,

Frans
