Subject: RE: NDA - Celotex RS5000

Hi Frans

Please find attached a copy of our 32 page test report for BS8414: Part 2 using Celotex RS5000.

Please find also some examples of 4 build-ups which we commonly see presented to us at design stage

- Design 1: Inside to out
2x 12.5mm Plasterboard
100mm SFS
12mm Calcium Silicate Board – A1
100mm Celotex RS5000
Unventilated Cavity
103mm Brickwork Façade
Stainless Steel Ties
- Design 2: Inside to out
2x12.5mm Plasterboard
100mm SFS
12mm Calcium Silicate Board – A1
100mm Celotex RS5000
Ventilated Cavity
8mm x Terracotta Cladding
Brackets and rails
- Design 3: Inside to out
2x12.5mm Plasterboard
100mm SFS
12mm Calcium Silicate Board – A1
100mm Celotex RS5000
Ventilated Cavity
Cladding Laminates – A1
Brackets and rails
- Design 4: Inside to out
2x12.5mm Plasterboard
100mm SFS
12mm Calcium Silicate Board – A1
100mm Celotex RS5000
Ventilated Cavity
Cladding - Aluminium – Class O
Brackets and rails

I think these best represent what's commonly specified and in particular what NHBC commonly see. The analysis will hopefully help us to better understand the risky parts of cladding systems.

It will also provide us with some insights on RS5000 fire behaviour and contribution to this risk.

We look forward to receiving your analysis early part of April. I am available at any time to discuss the details of the build ups as well as any part of the 32 page fire report.

Kind regards

Debbie Berger

Subject: RE: NDA - Celotex RS5000

Debbie,

Once you have received this, and are happy to proceed, I will study the test report and your requests for extension of the field of application.

I will probably have to talk to you about the details, but the end should be that you will receive a report which will give the final conclusions with a sound argumentation supporting it.

This might take a few weeks, I'm really very busy at the moment.

Kind regards,

Frans

Subject: NDA - Celotex RS5000

Hi Frans/Andrew

Please find attached a signed NDA for the desktop study to understand Celotex RS5000 field of application behind a ventilated façade.

Once this is signed and returned, what happens next? How soon can we begin the study?

Kind regards

Debbie Berger
