Subject: RE: NHBC and above 18m

Useful to get official confirmation from them though given the intel from Ardmore today it makes it very difficult with the NHBC to be able to say a definitive yes or no given there could be specific detail changes in the design that we are not aware of.

Either way I believe this gives us the chance to start a conversation with NHBC as they have asked for a response from us. Suggest we offer a meeting at Hadleigh (factory tour etc etc) or we all travel to Milton Keynes to meet with them.

Are you ok to suggest some dates to Graham. I'd rather have a face to face meeting on this then just respond in a letter. I think they need to be aware of the challenges we as a manufacturer now face on communicating where RS5000 can and can't be used. We need to start working closer with them and can update them on where we are with our overall message on RS as well as progress on desktop studies.

Thanks.

Please see attached letter from the NHBC regarding above 18m. Very interesting as it now states that a desktop study is acceptable as a means of compliance.

Regards

Rob
