Change Detail

Change the formulation for Hipchen produced FR5000 and CG5000 to replace BASF ElastoPIR 1039/501 with ElastoPIR 1039/503

Change Reason

To Save Approval Process)

Change to the formulation provides circa £20k saving per year based on 2012 forecast. This has been built into BP2013.

DL12/072 reported no adverse effect on board performance or overall yield.

Any remaining 1039/501 stock will be used on the Hennecke line.

As agreed at PLCP/PDI, no external testing will be carried out.
