Subject: RE: Grenfell Tower - Balance of Panels.

Hi Ben,

With regard to the Column panels to Grenfell Tower.

We'll get the Column samples, 1nr of each to you later this week.

To Fabricate the following Column Panels, Reynobond Smoke Silver metallic :-

WS35 – 2717x1386mm – 96nr
WS34 – 2717x1116mm – 240nr
WS37 – 2717x1116mm – 240nr
WS38 – 2717x1116mm – 192nr (96nr of each hand)

Please note, we would have to subcontract the 3mm thick Aluminium Hangers on panel WS35 as we don't have facilities to make these in-house, so I've excluded these from our quote, HCW to supply these free issue for bonding in our works. We would also fabricate the 45x45mm angle to the sides of Panels WS37 and the 55x35mm angle to Panel WS38 from Matching Reynobond ACM.

All for the sum of £140,000.00 carriage TBC.

Black PVC tape is supplied in 100mm wide rolls x 125m long @ £20.00/roll

Please let me know this is Ok and we'll proceed.

Regards

Neil Wilson

Subject: Re: Grenfell Tower - Balkance of Panels.

Morning Neil,

As we talked about last week, the type 17 panels are in abeyance; Kevin is going to re-issue the detail to clear up the issue on the jambs.

Could you let me know when the column sample panels will be delivered, along with your price for the bulk order. If you could let me know the supplier of your black tape or if you could supply it I'd appreciate it,

Best Regards,

Ben

Hi Ben,

I'll organise a sample of each and get these to site later this week, along with a quote.

How did you get on with the samples of the panels we delivered last week for between the windows ?

Please let me know.

Many thanks

Neil Wilson

Hi Neil/Geof,

Could you send your quote for the corner and column panels at Grenfell Tower please. I've attached the latest drawings to this email but they shouldn't be different to what we have previously sent you.

Best Regards,

Ben

Hi Neil,

How are you getting along with these panels?
We may need to order more of the Smoke silver material as the client might be going with the smoke silver on the crown after all.
Could you give me a call when you get a chance,

Best Regards,

Ben

Hi Neil,

Please see drawings attached for final sizes of the column and corner cladding at Grenfell Tower (in Smoke silver metallic). Please note that the 'Crown' location is not Reynobond anymore and can be discarded. WS30 and WS31 are sample panels, please could you produce ASAP with whatever material you can spare so we can prove the fixing detail on site before starting mass production. We are changing the sizes of the RAL9010 areas as per your comments and will advise shortly.

Best Regards,

Ben

Subject: Grenfell Tower - Balkance of Panels.

Hi Ben,

Following on from our telecom, I have to finalise the Reynobond production requirements to enable these boards to be put into production.

Please can you check the attached, this is an order schedule for the Smoke Silver only, I've worked on the sizes that you emailed, and I note that you have stated these are Notional !

I've not received any further information and need your assistance as to what will be required.

With regard to the RAL 9010 panels, the maximum panel width available is 2000mm and the min order is 300m2, the schedule shows some of these panels over 2000mm in both dimensions , which is not possible, please can you review the panels.

The schedule doesn't allow for any spares or extra's, will you need further panels ?

Please Let me know.

Regards

Neil
