Hi Roy

As just discussed, images and details of the 4 Tower blocks in Newport, Cardiff.

They are looking for 4 mm ACM cassette tray panels, not sure of the colour at this stage but job is circa 6 000 – 7 000 m2

Material has to be BBA compliant so I have attached a copy of ours FYI.

LSC down in Southampton have been asked to quote as the cladding contractor, I am not sure who the main contractor is or which other cladding contractors are tendering, but they are right up your street as they say.

Take care
Debbs
