 Subject: Proposed Amendment of Approved Document B

Ladies and Gentlemen

Following a very productive working party meeting on 10 June, I attach the latest versions of the draft RIA and Approved Document as agreed at that meeting.

It is proposed to issue these documents for the consideration of BRAC at its next meeting on 3 July therefore I would be very grateful if I could have any comments you wish to make by close of play on Monday 17 June. I am sorry for the short timescale, although those of you at the meeting kindly agreed to assist.

Tariq, Bruce and Tony - I would be grateful for your comments on both documents, but in particular the text of item 1 in Appendix A of the draft Approved Document explaining the role of UKAS, laboratories and fire safety engineers.

If you would prefer to discuss any aspect, please do not hesitate to give me a call. In the meantime I look forward to your responses.

Best wishes

Darren

Anthony

I have taken a look at the RIA.
 See my comments. It looks like it
 was done in a rush (which of course
 it was). It doesn't read clearly
 give the message that the Building
 Regs are only the messengers not
 the reason for the charges.

Caroline
