Clive,

A message from Mavis:

I am not convinced that para 24 represents a compelling case on the balance of value for money and in overall regulation.

Do we have a stronger case to make than this together with any costings and economic analysis?

Thanks,
Kerry

PS/Mr Hope

I was consulted on this and support the recommendations, but they do have important implications for delivery of our PSA target on fire deaths etc., as the submission suggests. If the Minister had the time for a discussion of these, I would welcome that.

CLIVE NORRIS
