Please see below from Matt Ramsay. I don't actually think there is much point in asking you to re-do the FRA in view of the imminent works when what he is really anxious about is reinstating the vets. I have already asked Alex to urgently seek this info from RGE on smoke extract /vents systems.

Hi Janice

Thanks for this I have just read through it,

I am assuming it wasn't reviewed in Jan 14 as per the front cover. No great problem there as little has changed especially for the residential areas. I would suggest we ask Karl to review the FRA as it relates to the smoke vent system as there are what appear to be dedicated low level inlet and high level extract vents on each floor which should not need to rely on leakage around the staircase doors to make up air. I would also like to confirm whether the system includes smoke extract fans at roof level. Due to the relatively small size of the vents installed I suspect these fans are provided however I was unable to confirm this during my site visit. This is not commented on in the FRA. Could you also let me see copies of the Maintenance records for the Smoke vent system for the last 2 years. As we discussed approx. 25% of vents do not appear to be in effective working order. Otherwise this is a broadly suitable and sufficient FRA.

Kind regards

Have a good weekend

Dear Janice

Further to our recent phone conversation please could you provide me with a copy of the FRA for Grenfell.

Kind Regards

Matt Ramsey
