Subject: Re: Grenfell FRA - alarms on roof and basement??

I have sent you the e mail of the 23rd June ref boiler rooms and fire alarm systems, Claire has stated that a new fire alarm system is to be fitted in the boiler room, do not know any more about the lift motor room system.

Do of the fire alarm systems were monitored by the Grenfell Tower panel, Claire should have all the answers?

Carl

C

Lost the plot with this one. Rydons did not work in the roof and I cannot recall where we got to with the basement fire alarm - do we need one or not ??

17a

High

There are 2 areas of this building covered by BS 5839 Part 1 manual and automatic fire detection systems, the roof level area and the basement boiler room.

Where is the fire alarm panel (s) for these fire detection systems?
Are these 2 fire alarm systems in full working order?

Also, where did we leave discussions on the fire alarm sin the other plant areas - adair, clarendon etc.
- do we need them or not?
Please advise

Thanks

Janice
