Hi Abi,

Just had a brief discussion with Dan.

As the doors are demised to the Leaseholders, it is the Leaseholders responsibility to ensure that the doorset complies with the RRO.

As a responsible landlord we should however alert the leaseholders to this and highlight the legislative requirements.

I am slightly apprehensive about us recommending an FD30S doorset as this may not meet the full requirements of the Building Regulations despite the stance taken by LFEPa and Building Control.

I suggest a review of the applicable building regulations and if the approach currently being adopted is acceptable to the organisation then we could offer to assist Leaseholders by facilitating a private arrangement for the installation of equivalent doorsets with the Contractor due to undertake works to the tenanted properties within blocks.

Any such arrangement would be a private one between the Leaseholder and the manufacturer/installer.

Catch up later this week.

Regards  
Mark

Mark Anderson  
Director of Assets, Investment & Engineering

Dear Ms Acosta,

We write on behalf of Grenfell Tower Leaseholders Association, in relation to your letter dated 7th March 2011 in reference to flat/unit door entry replacement programme 2011-2012. This letter has been circulated and sent to the tenants of Grenfell Tower but not to the leaseholders of Grenfell Tower.

You mentioned in your letter, "following our recent Fire Risk Assessment surveys it has been identified that your door requires upgrading to meet current standards". Surely if replacement is required for

CST00003136\_0002

CST00003136/2

doors to meet certain health and safety and fire regulation standards, then this applies to all the doors of Grenfell Tower. The assertion is that the doors of the leaseholders are identical and no better equipped than that of tenants. Thus it is quite logical to request that leaseholders are made part of the communal upgrading. The leaseholders of Grenfell Tower are NOT IMMUNE from fire risk. We find this development provoking on your behalf, especially with your lack of communication.

Also, residents of Grenfell Tower have been awaiting for the replacement of windows for a long time, indeed K&CTMO served a section 20 Notice in 5th April 2007 for intended works including the renewal of all windows since the windows in their existing condition "pose a health and safety risk". Nearly four years later, the works have still not been carried out where as adjoining blocks have had their windows replaced. Bearing in mind the building is in close proximity to main roads and railway, with the prospect of an academy being developed nearby; there is all the more reason that the replacement of windows. We do not expected to be excluded from such a development.

If you could please reply soonest with a date of when all leaseholders doors will be upgraded to the same standard of the tenants.

Kind Regards,

Keith Mott  
Secretary  
Grenfell Leaseholders Association
