Subject: RE: Grenfell Tower - Ferrier Point Cladding Details

Mark,

Thanks for this. I've spoken to Bruce (Studio E Architects) this afternoon. I've confirmed that I'm happy for him to contact yourselves but to ensure I'm copied in so we keep some sort of protocol guidelines from the start. He may be after details to get the render drawings correct. It may be worth inviting him into the relevant Dropbox files save me copying and pasting info into an email.

One thing I would ask, which I'm sure you'll do anyway, is that anything financial stays between ourselves.

Have a good weekend and we'll catch up next week.

Regards

Simon Lawrence, ACIOB, MInstLM

Subject: Grenfell Tower - Ferrier Point Cladding Details

Simon

I've put a Dropbox invite over to you which has some Ferrier Point cladding details contained.

It shows the typical cladding joint being 10mm, with a black joint (this would have been the "t" bar rail polyester powder coated). I've also included some photo's, one in particular (mast climber shot) is fairly his res, and when you zoom in you can see the joint detail quite well.

I've also included a head and cill detail, which shows the window shelf angle which forms the basis of our current proposal for the glazing.

Hope this helps, have a good Easter!

Kind Regards
