**Subject:** Mock up

Good evening Simon,

Apologies for the email as I tried to call earlier but couldn't seem to connect, I wasn't sure if you would appreciate a call on a Friday night!

I thought it best to send a courtesy email just to enquire if you're satisfied with the mock up in its current state?

As you know we encountered problems with the existing structure as it wasn't reflecting the architects drawings for which we fabricated our carrier frame.

Add this to a lot of issues with the scaffolding and we have had to adapt our mock up to allow the coloured panels to be viewed.

The works on site do not replicate the drawing we produced however our brief was to ensure your client was able to view the panels to select the colour.

Hopefully this mock up will allow this to happen.

If there is anything else we can do to assist, then feel free to call me.

Have a good weekend

Regards

Rob
