

The Residents of Grenfell Tower are United for the Common Cause of Demanding Improvements in our Living Standards and Fair Treatment

We want a fair and just resolution for the catastrophic power surges of May 2013. If we do not fight now, we will lose our dignity as residents.

Attend the meeting on Thursday 15th August at 6:30pm at the EMB office to bring the matter to the forefront of their attention. The power surges resulted in 60+ residents losing their appliances. The EMB/TMO/COUNCIL insurer refused any liability and the TMO want to give us a handout of £200 for affected residents. This is NOT sufficient compensation by any means! This is an insult to us.

94 residents have already signed a petition displaying their anger and we need to **make a stand on the unjust handling of the issue at the meeting.**

In relation to the Grenfell Tower Regeneration Project, they have been playing delaying tactics for over a year. This is while they continue to build the school and leisure centre and have turned our living environment into a wholly inconvenient building site.

We demand answers from our Area Manager Ms Siobhan Rumble and Estate Officer Ms Jan Jones, who gave us false promises which have not been realised. **We do not need another consultation, we want tangible work commencing NOW.** We want work to begin on the windows, cladding, heating and hot water and our new kitchens NOW. **We want the truth and an end to the delaying tactics on the GTRP.**

From Tunde of Grenfell Tower Leaseholder's Association and Eddie from Grenfell Action Group and Please be there with one voice and this is our strength at EMB office. Don't allow anyone to divide us then rule.
