Subject: Grenfell Tower National Grid Works
Attachments: Pre Construction Survey Letter CT - Grenfell Tower.docx

Good Afternoon Mr Ahmed

I write in relation to your email to the TMO and Cllr Blakemans subsequent email to the TMO.

From your email you indicate that National Grid have attempted to conduct a survey of your property. National Grid have confirmed they are attempting to survey as many properties at the block as possible.

As you may be aware National Grid have been working on site at Grenfell Tower in relation to a new supply on their work and have installed a new riser as one of the gas risers on their network was beyond repair in its current location. Properties have subsequently been reconnected to the disconnected supply.

National Grid are also keen to survey to move the other existing properties onto this new supply as they have identified the other risers to be a priority on their planned upgrades as due to age will require replacement. These are unable to be rerun in the current location and connection to the new supply is their solution for this.

I attached the letter from National Grid that was sent to residents regarding this survey. I encourage you to contact the number attached to communicate your concerns as the surveyors on site will be looking for feedback from residents before they carry out further works and would emphasise this is works by National Grid and not the TMO in regard to the gas network. National Grid are responsible for the supply of gas up until the meter of each property. We are encouraging National Grid to provide as much feedback as possible and can see from this letter they have started this communication and clear proposals should be provided to each resident on request.

I hope this response outlines the lines of responsibility and how you are able to move this forward with the responsible party.

Many thanks

Anthony Cheney
