**Subject:** Re: Protecting residents on the front-line of KALC construction project?

Dear Eddie

Thank you for your e-mail.

The TMO has been very open about the future timescale of other works around the estate. We are going to do Grenfell Tower first, because Grenfell Tower is in the poorest condition, and you made it clear that the central heating was insufferable. We have listened to this and acted upon it. The HRA does not at the present time have sufficient resources to undertake additional work, however we are working on ways to find extra resources for all our estates. We are probably about £70M short at present, but we are seeking ways to address this issue.

I fail to see how a Grenfell Tower residents Association has a remit beyond Grenfell Tower, perhaps you would help me on this one. I believe the correct spokesman for this wider issue is the EMB and the TMO are in constant contact with them.

Cllr Tim Coleridge

**Subject:** Protecting residents on the front-line of KALC construction project?

Dear Councillor Coleridge,

The Grenfell Action Group are just in the process of finalising our Mission Statement with regards to becoming an official RA type organisation.

Part of our Mission Statement dedicates the Grenfell Action Group to campaigning for the instillation of sound proof glass/double glazing in ALL properties that will be on the front-line of the proposed KALC construction project. This would include Verity Close, Grenfell Walk, Grenfell Tower, Barandon Walk etc....

Please can you update me with what steps the Council are going to take to ensure the well-being of residents who live in these dwellings and whose windows at present are over 35 years old, single pane and not fit for purpose?

Please can you assure our community that all residents living on the front-line of the proposed construction work will be provided with adequate protection from noise pollution by way of improved windows?

Regards,

Edward Daffarn

Grenfell Action Group.
