Grenfell Tower – Propaganda, Lies and Fact

Posted on [June 25, 2015](#)

It has come to the attention of residents of Grenfell Tower that our local elected Councillors are misrepresenting what is actually happening to tenants and leaseholders as a result of the Grenfell Tower Improvement Works.

Councillor Blakeman, in a recent report to the Constituency Labour Party, claimed that only twelve households are resisting the works being carried out in their homes and that other residents are “furious” that those resisting the works may delay the completion date of the project.

We believe that Councillor Blakeman is merely parroting TMO propaganda on this issue, that she is working against the interests of residents in trying to minimise the level of opposition to the poor standard of work, and is not giving the true facts.

In a recent door-knocking survey carried out by concerned Grenfell Tower residents we found that 39% of households had not had the HIU work done and we believe that approx 46 households are actively resisting work being carried out as currently planned.

We are also aware that a significant number of residents who have allowed the work to be done are not satisfied with the standard of the work delivered by Rydon and many claim they felt bullied into having the work done by the TMO in the first place.

On SATURDAY 27th JUNE residents will be meeting at 10.00am by the “pink thing” on the lawn next to the new Leisure Centre. We will speak with our local Councillors at their surgery and get them to explain why we have been misrepresented and how they intend to help us get justice in the future.
