Subject: Grenfell Tower - Fire

Zeni

Please see the below as discussed on 14th June 2017 in the London office.

Can you please confirm back that this is correct, thanks.

Zeni Canaj statement

Aftercare visit – Grenfell Tower – 13 June 2017 – 11701 – loss of heating and hot water – 65 Grenfell Tower
Arrived at approx. 14.30/15.00
Attended property and fixed issue.

L:34507808v1

Came out of the building and saw 4 people 1 of which was the caretaker for the site who I have met on previous occasions. Spoke to him and asked if they had any knowledge of other leaks within the plant room (attended to a leak in the plantroom last week) since my last visit.

Another gent with a KCTMO, (Kensington and Chelsea Tenant Management Organisation) logo on his shirt said to me that he had noticed 2 other leaks in the plant room. I asked him if he had reported it to JSW and he stated that he had reported it to his office but was unaware if they had forwarded it on to us. He then pointed to another gent and said we have other issues at the moment. The gent he pointed at was from a fire inspection company (can't remember the company name). This man stated that none of the alarms are getting registered on the alarm panel and BMS panel.

I asked what was being done about it and they said that this was the issues they were trying to sort out. My intention was to inform Steve when he got into work this morning and ask if we have been informed of these issues as we attended in may for similar (see JSW defect 11600)

I then left them to attend to another defect at Holland park.

Kind regards,

Toby Guise
