---

Yep, solid approach as far as I'm concerned.  
Best regards,  
Richard

Gents

My thoughts on the agenda for tomorrow are

- <!--[if !supportLists]-->1) <!--[endif]-->Outline the latest BS8414 tests on ACM and Aluminium
- <!--[if !supportLists]-->2) <!--[endif]-->Outline the ISO 13785 tests and our thinking going forward on this
- <!--[if !supportLists]-->3) <!--[endif]-->Discuss NHBC position on desktop studies
- <!--[if !supportLists]-->4) <!--[endif]-->Discuss NHBC position of K15 behind brick / concrete etc
- <!--[if !supportLists]-->5) <!--[endif]-->LABC/Premier Technical memorandum
- <!--[if !supportLists]-->6) <!--[endif]-->AOB

Personally I would steer clear of the historic meetings and their failure to come back on any agreed items, we should treat as clean sheet and focus on our latest testing.

What do you think ?
