Hi Darren,

As discussed, on the 24th May at approximately 09.30 Magnus attended Grenfell Tower to investigate a coil of FP Cable that had been left coiled as requested by Simon. After walking the site with the caretaker Magnus found the cable that had been left (we assume) to add an additional Smoke detector in the plant room area, the Caretaker stated that the company was attending in around a week to rectify as the site was still under defect due to the recent fit out and upgrade works. After chatting with both Simon and Maria, Simon liaised with Janice (head of H&S) and I was instructed to have Magnus leave with no further action. We charged an hours call out and Magnus should have marked his call sheet with this information.

Best regards

Mark
