Rebecca,

Literally no idea why this guy keeps pestering me.  
Check out photo 3, it would appear to be something splattered on a wall... interesting.. not.

Ben

Dear Mr Dewis,

I am requesting that the London Fire Brigade come and inspect the new gas pipework that has been installed in Grenfell Tower.

The Vice-Chair of the Grenfell Tower Leaseholders Association has made the following concerns public and these health and safety fears are backed up by a number of tenants.

We have also been informed that the National Grid will not be returning to Grenfell Tower to re-earth the power supply to newly installed meters.

Please can you keep this correspondence private and confidential between ourselves as I fear repercussions from my landlord if they discover the source of this complaint.

Kind regards,  
Edward Daffarn  
Grenfell Action Group

**Subject:** Seriously exposed newly installed gas pipe line throughout the entire staircase of Grenfell Tower poses extremely serious health and safety Risk.

We hope this email find you very well.

The KCTMO manages over 10,000 housing stock for the RBKC that's includes high rise building such as Grenfell Tower.

Could you please kindly provide us the health and safety certificate authorised that the KCTMO or the National Grid that they obtained permission before installing the gas pipe going through the entire staircases of the Building?

Finally, the KCTMO has habit of shooting the messenger because they may NOT agree with the message BUT we strongly feels that its a serious health and safety concern needs clarify either from our Landlord or from their managing agent the KCTMO.

"The Notting Dale councillors are dealing with this, along with everyone else involved at the TMO".
