Hiya Peter

This is a really interesting and informative presentation.

My only comment would be that I think you could say more about human behaviours and the impact that has on high rise firefighting and search and rescue, and the impact that any recent high profile high rise fires will have on the likelihood of people self evacuating and blocking our path etc.

Thanks  
Dany

**Subject:** Commissioners high rise presentation draft

Dear All

I have been asked to draft a presentation on high rise incidents for use by the Commissioner at a meeting of the Worshipful Company of Firefighters.

The 'brief' for this presentation is to set out the risk associated with tackling incidents in high rise buildings and how we (LFB) manage these. There will be a second speaker at the same event (a principal officer from Hong Kong FRS) who will be tackling the same topic from his/her service's perspective.

This presentation is based on the new high rise firefighting GRA (which was written by LFB and is due for imminent publication by CLG).

I would appreciate any feedback or comments you care to make on the attached (by 7<sup>th</sup> March please)?

Many thanks

Peter

Peter Cowup  
Deputy Assistant Commissioner  
Acting Head of Operational Procedures
