20120829 - Grenfell Tower - Building Regulations Guidance.xlsx

John/Dave,

We are the engineers that are employed by the RBKC TMO on the Grenfell Tower project. The project contains many different elements such as existing residential refurbishment, new residential flats within the footprint of an existing office. We have put together a spreadsheet showing our interpretation of what sections Part L of the building regulations apply to the various areas of the project. We would be grateful if you would return comment on the attached schedule as we want to make sure we are designing to comply with the correct regulations before we move beyond stage C.

If you would like to talk through any aspects of the project please feel free to call me on the number on the footer of this email.

I look forward to hearing from you,

Kind regards,

Andrew
