Very grateful . Their Issues were : Heavy door + pigeon shit from unnetted pipes+ individual heating costs proving greater than originally told + eddie claims that centralised heating costs NOT taken general rent bills + Willie/ Woodie says that he has been left without gas for weeks and all they have done is leave a single ring electric hobb outside his door and National grid getting nowhere . That was it . RA

As I said earlier **DON'T** reply now. I will sort it out this afternoon. If you copy Willie at this late stage you are open to mega criticisms from the usual suspects that you aren't interested in Grenfell's problems. You should have done it after surgery, not wait over 10 days.

I am meeting Eddie and Willie this afternoon. Can you let me know what action you have taken on the complaints they brought to you at the surgery, because they say nothing has happened.

I have had a look at Eddie's post yesterday on his Grenfell Action Group blog and the problems look pretty horrific from the photos he has used.
