

GRENFELL TOWER INQUIRY

SPECIALIST REPORT: ARCHITECT

August 2020

- i) This report, ("Revision 1") has been amended to correct typographical errors and some basic mistakes of fact as contained in the first issue of this report which has been circulated to Core Participants and other Experts. I have also occasionally incorporated some clarifications. All such amendments are recorded on an errata sheet which is separately issued with this report.
- ii) Of particular note in terms of corrections has been the need to correct my reference at a number of points within Section 4 of my report to Rydon as 'rainscreen contractor' and to the existence of a 'rainscreen contract'. I am grateful to Studio E for pointing out this error and apologise for any confusion that this has caused. Where these references appear they should have referred to Rydon as 'Design and Build' contractor and to the existence of a 'Design and Build' contract. Due to a formatting error, these mistakes crept into the final version of my first report, but have now been corrected in this Revision 1.
- iii) I am also preparing a short Supplemental Report. This will address areas where my views have developed or changed, or where I consider that further explanation of my opinion is required, including in response to some of the opening submissions in Module 1 of the Inquiry.
