**Subject:** RE: Grenfell Environmental Fans

Hi David

Thanks for coming back so quickly.

I can confirm the cost supplied is acceptable, please proceed.

I have been given a date of 18<sup>th</sup> of April when the final damper will be fitted and the system can be fully commissioned.

If we can get the kit to site asap we will be in a good place to close this project out.

Kind regards,

Alan Whyte

Hi Alan

Just to confirm we can accommodate your requirements at a cost of £2,562.00 including delivery but excluding fitting & commissioning.

It may also be of benefit if we adjust the system to open each floor individually in environmental control mode.

We trust the above is in line with your requirements and look forward to your further instructions.

Best Regards  
David

**Subject:** Grenfell Enviromental Fans

Hi David

We have an issue at Grenfell I hope you can assist with.

The break-out noise from the environmental fan in the entrance lobby is unacceptable as it stands and we need to reduce the duty of the fan.

Having had a chat with Granville it would appear the solution would be as follows

- Fit an inverter to your panel to control the fan speed
- Modify software to section the environmental system to allow required air movement with fans running at 30% of maximum

Could you please confirm this would be possible in the 1'' instance, and also provide costs as soon as possible afterwards.

Kind regards,

Alan Whyte
