West Estate W11**

SUBJECT: The catastrophic and highly dangerous power surge during May 2013 and delaying the compensation packages. And the delay in commencing the Grenfell Tower Regeneration Project by the KCTMO.

FOR THE URGENT ATTENTION OF

The RBKC

Cllr. Nicholas Paget-brown- Leader of the Council

RT Honourable Sir Malcolm Rifkind MP,

Cllr Rock Fielding-Mellen Deputy Leader of the Council & Cabinet member of Housing, Property and Regeneration

Cllr Tim Coleridge former Cabinet member of Housing, Property and Regeneration

Ms Laura Johnson- Director of Housing

Local councillors

Cllr. Judith Blakeman, Cllr Todd Foreman & Cllr. Atkinson

THE KCTMO- Tenant Management organisation

Mr Robert Black – Chief Executive

Mr Peter Maddison- New Director Asset and Regeneration

Ms Sacha Jevans- Director of Customer Services

Residents of Grenfell Tower at Lancaster West Estate W11

TMO Board Members and Chair of The Board Members Ms Fay Edwards

TMO/EMB (Estate Management Board of Lancaster West Estate

Siobhan Rumble- Area Manager of Lancaster West and Income Manager of TMO

The secretary and chair of EMB and Board Members

Severe Power Surges at Grenfell Tower during May 2013

The catastrophic and highly dangerous power surges during May 2013 have destroyed many electrical appliances belonging to Grenfell Tower residents. What caused the power surges that destroyed so much property, endangered our lives, and delivered so much frustration and distress to the residents of Grenfell Tower? We still do not know the chain of responsibility in an emergency such as this, which is quite frightening for us.

The New Director of Asset and Regeneration of KCTMO Mr. Peter Maddison very unwisely did not take the matter seriously by stressing the number 7, ignoring the huge scalability factor of the problem. This assertion also raises concerns about his stance on the health and safety and wellbeing of residents. We would like a thorough and robust explanation on this.

Grenfell Tower Regeneration Project

Contrary to the leaflet dropped by the TMO and the area Manager of Lancaster West Estate dated 14th June 2013. The only aspiration we have in mind is for works on Grenfell Tower to be in tandem with the KALC project as intended and as promised. The only way the council can make the KALC project a success story for the community and future generations is to revive the GTRP immediately and start the project NOW as promised.

It is not our aspiration but a necessity for the GTRP to deliver:

- A new efficient heating system
- New Double glazing windows
- External cladding to improve energy efficiency

Residents of Grenfell Tower at Lancaster West Estate W11

- Improved external and internal repairs and communal spaces

It is unthinkable that they will begin to deliver the GTRP by their potential sub-contractor when the KALC will be open in September 2014 with over 2000 people entering in and out of the academy and leisure centre each day. GT is only yards away and the opening of the KALC will impose immense suffering on residents. Our lives are far more valuable than the TMO give to their corporate interest. Having witnessed firsthand the experience of seven months of KALC construction, it will be near impossible for such level of commitment to operate with an opened academy and leisure centre. They are out of their minds.

TMO/RBKC minutes of the meeting held on 21st March 2013

4. Grenfell Tower: there was regret at the delay on this project, and it was queried who was leading on the project. Confirmation was given by Peter Maddison that he was negotiating with Leadbitters on the way forward.

Sacha Jevans presented this report, and gave apologies for Mark Anderson, Director of Assets and Regeneration. The Grenfell Tower Regeneration Project was being carried out in conjunction with the RBKC's KALC project framework.

We the resident wants to know if the RBKC committed the GTRP and that it must be within the framework of the KALC project that it has so drastically been delayed. We need an explanation why Mr Peter Maddison, the replacement of Mark Anderson, who has no local knowledge, was allowed to hijack the project from the RBKC appointed contractor the Leadbitter. The planning application has been withdrawn six times, prolonging the GTRP project to an indefinite period to kill the project.

Our Demands

The residents who lost their belonging due to severe power surges must be compensated immediately and it is almost a month NOW. The TMO/EMB failed to take appropriate action and we are without our basic necessity for so long now. We need charity of chain of responsibility from EMB/TMO.

Residents of Grenfell Tower at Lancaster West Estate W11

Now more than ever, the KALC project has made it absolutely necessary for improvement works to begin on Grenfell Tower. We will fight for this to begin immediately! We, the residents, demand Leadbitter to carry out the GTRP project as it was approved by the RBKC. We reject the idea in the strongest possible terms that the TMO needs to find another contractor through the tendering process, instead of going with Leadbitter who were approved by the council.

In this latest debacle, our wellbeing and lives were put in danger, so enough is enough. We demand robust changes how the KCTMO/EMB run as a tenant led organisation. So far nobody has come forward either from the council or TMO/EMB to take responsibility. The bureaucratic games with the residents of GT must end. The council's appointed Managing agents are destroying our community of LWE.
