

I asked for all FRA activity between 2012 and the date of the tragedy. We were specifically seeking to verify the position on specific action that we were struggling to find the position directly in W2. In asking for a wide scope of information and not informing the member of staff on the reason for running the reports, I sought to manage the exposure. It should also be remembered that we are running these reports off a legacy system where data cannot be changed.

The screenshot shows the Vrs2 Report Manager interface. The browser address bar displays the URL: http://hal/Reports_HAL/Pages/Folder.aspx?ItemPath=%2fHealth+and+Safety%2fFire+Risk+Assessment%2fVrs2&ViewMode. The breadcrumb navigation shows: Home > Health and Safety > Fire Risk Assessment. The page title is "SQL Server Reporting Services Vrs2". The top navigation bar includes links: Delete, Move, New Folder, New Data Source, Report Builder, Folder Settings, and Upload File. Below this is a table with two columns: "Type Name" and "Description". The table lists several reports, each with a checkbox on the left and a document icon:

Type	Name	Description
<input type="checkbox"/>	Blocks Assessed by Date vrs2	
<input type="checkbox"/>	Fire Risk Assessment by Block Assessment vrs 2	
<input type="checkbox"/>	Fire Risk Assessment by Team User -Vrs2	
<input type="checkbox"/>	Fire Risk Assessment Priority Actions Breakdown-vrs2	
<input type="checkbox"/>	Fire Risk Assessment Total Actions Breakdown- Vrs2	
<input type="checkbox"/>	Fire Risk Findings and Action Plan -Vrs2	
<input type="checkbox"/>	Fire Risk Team's Summary -Vrs2	
<input type="checkbox"/>	Fire_Risk_Assessment_by_Block_Assessment_vrs_2_Block	

A search bar is located at the bottom left of the table.
