Subject: eBrit Services Ltd - Grenfell Tower Project
Attachments: Capability Document.pdf; Case Studies Document.pdf

Afternoon Adam,

I have been speaking with Simon O'Connor in regards to the Fire protection & Fire stopping enquiries for the Grenfell Tower Regeneration project and Simon has advised me to contact yourself in regards to being included on the package enquiries. I understand from Simon that there may be an intumescent FP treatment requirement for the Structural Steel and may be some fire stopping works to follow and wish to note our interest for this package.

eBrit Services Ltd are a local FIRAS accredited passive fire protection company with offices in Uxbridge and Canvey Island. Our core markets are working within the construction, Industrial, social housing, Education, retail and underground markets in the London and home counties areas.

Please find attached my company information and some case studies for review at your leisure.

Any further information you require or anything else I need to do to be included in the Fire stopping enquiries please do not hesitate to contact me.

Thanks for your time and I hope to hear from you.

Kind Regards,

Jordan Edelman,
Business Development Manager
eBrit Services Ltd
