Simon

Not sure if you are aware of these building control preliminary observations that were made at the end of last year (attached).

They raise a number of concerns in relation to additional doors/ specification fire ratings/ venting. They will also have ironmongery implications.

Based on our experience at KALC where the process dragged on over a long period I am keen to sit with John and Paul and go through these issues and clarify them all in order to eliminate risk.

Before doing this I think it would be good to re-appraise the Fire Access Plans with revised drawings, but to do this it would be useful to know whether there had been any further clarity on the last proposals to EMB office area?

Regards

Neil
