Dear Jackie, Clare and Andrea

I agreed to give you an update on the recent issues with the lifts at Grenfell Tower.

There are two lifts at Grenfell Tower. I have reviewed our records and over the last six months, lift H091 has experienced a high number of callouts with 20 call outs over this period. In most instances the lift was returned to service on the same day, however the lift could not be reinstated and was shut down between the dates of 7th February to 10th February and 13th February to 16th February. The shutdown of the lift H091 was the result of a blown processor board. The replacement part was not readily available and the contractor had to source a replacement before the lift could be reinstated.

When reinstating the lift, our contractor has also checked the contacts and rollers and adjusted the lift car door alignment needed to be fully adjusted. It is hoped that this will resolve the problems that have been experienced over recent months. Furthermore, a clean down of the lift shaft was carried out in January 17, although this is not thought to have contributed to the ongoing faults.

The second lift (Lift H090) has received 9 callouts over the same six month period. In 5 of these instances our engineers found the lift to be working on arrival. This is often the case where lift doors are held open – the lift will shut down and reset itself. However, residents may call out the engineer in the meantime. All faults reported on Lift H090 have been repaired and the lift reinstated on the same day and within the target time. Both lifts were out of service on 13th February for a period of time and clearly this caused significant disruption to residents of the block.

Servicing:

Our contractors carry out a monthly service inspection of every lift in the borough.

These visits ensure that lifts meet health and safety requirements and are an opportunity for the contractor to carry out necessary planned maintenance to help reduce the risk of future breakdowns.

The contractor produces a certificate for each visit attached are the last three months certificated for both Grenfell lifts.

Responsive Maintenance:

The lift contractor is paid a fixed fee for maintenance. This should act as an incentive for them to undertake effective planned maintenance and reduce the number of callouts – they get paid the same amount for 20 call outs as they do for none.

In reviewing the recent callout history of Lift H090, it is clear that the contractor has not been effective in identifying the over-riding problem with the lift contacts and rollers which have caused so many of the responsive breakdowns.

This is poor planning on the contractor's behalf and we have raised the matter with their directors as part of an ongoing discussion about their performance on this contract.

We recognise the disruption and inconvenience caused to residents and would like to assure you that we are working very hard to improve the performance of our contractor and the reliability of the lift service. Lift performance is one of the key performance indicators that KCTMO and the Board review on a monthly basis. We recognise that the current service is not meeting expectations and we have escalated this to a senior level with the contractor to try to achieve the standard set in the contract.

I hope this helps explain the context of the recent problems. We hope that the recent repairs will give a longer term solution, but we will continue to monitor the situation closely.

Yours sincerely

Peter Maddison
Director of Assets and Regeneration

Dear Peter

I hope you had a good half-term break.

Thanks for the notes below which tie in with my notes from the meeting. I will forward them as soon as they have been agreed by the Committee Officers for circulation.

Unfortunately, last week the Grenfell Tower lifts were both out of order at the same time (I climbed up the stairs with a resident to the 6th floor where their flat is on one occasion and was very worried they were not going to make it). Information about lift maintenance and what this actually involves as well as reliability would therefore be welcome asap. I am sure that you have also been made aware that the main entrance door fell off again last week and narrowly missed severely injuring someone – I think they suffered some injuries. It would appear that this door is dangerous and not fit for purpose, I do hope that whoever proposed/supplied the door will be held to account and suitable improvements will be found. If it had landed on a small child I dread to think what the consequences would have been. I would be grateful if you could let me know asap what action is being taken to resolve this Health & Safety issue.

Thank you for inviting either myself or Clare to join the Resident Asset Management Panel. We would very much like the RA to be represented on the panel, however I do not have any more time to give to RA/TMO matters and I also know Clare is very busy. Would it therefore be possible for us to select an RA committee member to attend as our Lancaster West RA representative at our next committee meeting which is 2 March?

We look forward to meeting Alex Bosman in due course.

I look forward to hearing from you further regarding these matters.

Kind Regards

Jackie Blanchflower

Dear Clare and Jackie

Thank you very much for giving me the chance to address your TA meeting last night. I found it a very useful meeting, (well organised and chaired too) and I hope it can be the start of a dialogue between the TA and my team.

As I said this evening I would like to start to talk to Lancaster West residents to understand their priorities for works to their homes, blocks and estates so we can plan future works. I would like Alex Bosman (Head of Strategic Investment in my team) to meet you and discuss how best to take this forward. I will ask Alex to contact you.

The following are the actions I picked up at the meeting. Please let me know if I missed anything.

1. External & Communal Repair and Redecoration

- We need to start to plan these works with residents. Timing cannot be guaranteed at the moment, but we can work up plans that can be delivered once we have reviewed our programme priorities.

2. Kitchen and Bathroom Renewals:

- I agreed to contact all residents who have had surveys and let them know the outcome, next steps and likely timescales. I agreed to do this by early April.

3. Grenfell Lifts:

- I agreed to provide evidence of our monthly servicing.
- I also agreed to provide details of the recent breakdown history of the Lifts for information.
- We will continue to work to make sure that the Lifts are working as they should.
