Hi James,

As requested,

Dry Riser, Hydrant

I have attached the last sheets we have as they have only been tested again yesterday and I have not received the latest certificates yet.

Lightning Protection

Not provided by us previously (I believe RMA have been completing). We had booked a test for our LP company on the 12th of July but had to abort due to access issues, I am awaiting a date for the return visit

AOV

I have attached the last sheets, as awaiting full information from the last visit by Colt.

Fixed Electrical

Not provided by us at this point (I believe RMA have been completing).

EML

We are doing a full test today of all three blocks, as we had to abort testing twice before Waites took over the running of the site. Our Engineer is now inducted to access the controlled end so will be completed in full 21-07-2017.

I believe you are aware that we were overdue on the EML testing at the time of the Grenfell Fire and the Hurstway AOV,, I have also attached the full certificates that were provided by Andy for the complete site including Grenfell in case they are also required, they are the last PDF attachment on this email.

Best regards

Mark Mathers
