

I'm firefighter Andrew Brooks [REDACTED] 51K of Euston R/W & have been there 18 years. I had no knowledge of the premises. I was a station when I received the alerting & I was riding A236 we approached the incident from the east & we sited the appliance as close to the incident as possible & this did not change. The scene of arrival was busy & very hectic with the virtually the whole tower block on fire. We were tasked with firefighting to protect egress we were in EDRA on going up to the 4th floor we meet a crew with casualties who said there was someone collapsed on the 7th floor the stairwell was heavy smoke logging. This was a very stressing incident as contact with public wanting to know about relative. We left the incident at 09.30.
