

FF WHITLEY, BATTERSEA RED WATCH,
PAY NO: [REDACTED] 2R, Time served: 8 years

Incident number: 076029-14062017 TOC: 08:55 hrs DATE: 14/06/2017
ADDRESS: Flat 16, Grosvenor Tower, Lancaster West Estate W11. 1TG
Location at time of ordering: Balcenra fire station which is my base station.
Detailed to role H271.

Direction of approach: approached from Earls court to West way roundabout
and parked the truck on Sirdac road where H271 stayed all night.
on arrival the entire front right corner off the building was on fire critically
and it began rapidly spreading.

My role at the incident: rigged in B-A and carried 2 lengths off
hose and a branch to the ~~fire~~ building area for gear to be taken to
the bridge head. I then assisted with the evacuation of the aerial appliance
as it was being compromised by the growing fire.

I was then detailed in part off a B-A crew with H Nallall who is also
from H21 to make our way with hose, fire and a length of
hose to the 15th floor, set into the dry riser and second flat
122 for insertion. we made it to the 15th floor, I broke the
dry riser glass with the branch, plugged the hose in and charged
the hose that H Nallall was holding; we then left the branch and
hose in a safe place for oncoming crews to use and we proceeded
to make our way back to the entry control point which was now
moved to the ground floor.
