22	Q. Was that the one you came up in?	22	SIR MARTIN MOORE-BICK: Yes.
23	A. I can't remember now which one we came up in.	23	MR MILLETT: I'm going to change to a different topic.
24	Q. After the call finished, did you stay in your flat?	24	Mr Neda, is it convenient to you to take a break
25	A. No. Well, we stayed in, but every now and then I would	25	now?

12	SIR MARTIN MOORE-BICK: Would you like to go with the usher,	12	Q. Did you see it and look?

18	(11.00 am)	18	A. I'm not sure.
19	SIR MARTIN MOORE-BICK: All right, Mr Neda?	19	Q. Can I then go back into your statement and pick up the
20	THE WITNESS: Yes.	20	evidence at the point at which you're in your flat, in

22	THE WITNESS: Yes, thank you.	22	When you smelt it, was it the same smell of burning

23	Q. So just to be absolutely clear, this is at the point	23	How long did you spend in the lobby?

I think my mum had visited them, or they had visited my mum, I can't remember, on a previous occasion. So they felt most comfortable coming with us, so they followed us into our flat; the rest followed the other neighbours.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	the conversation, I don't think I was even listening, but I could see out of the corner of my eye that she was speaking to someone. Q. Do you remember who she was speaking to? A. No, I don't remember. Q. All right. You say that you took them in, I think to the living room. A. Yes. Q. That was the whole group, is it? A. Yes, everyone went into the living room. Q. Okay. On page 6 of your statement at paragraph 35, you say: "35. The two Iranian women stayed close to my dad. Mariem and her mum sat on the sofa in the living room." You then go on to say that you knew her from going to school. Where was your father at this time? A. So my dad was also walking around the flat quite a lot, so he spent quite a lot of the time in his bedroom, but he would every now and then come into the living room. There was a stage where I told my dad to just stay close to us, because every time — I just felt like we

3	But even after I did tell him that, I remember there	3	smoke, as far away from the smoke as we could be,
4	was another occasion where he just went into his bedroom	4	I realised that around everyone's noses, there was

6	told us, "Don't go into my bedroom because the fire's	6	I just realised that must be around my nose as well, so

8	Q. At paragraph 36, you describe how the smoke was coming	8	Q. How soon after the group came into the flat did you
9	in, and you say:	9	notice black marks around people's noses?
10	" the flat was filling up the flat slowly."	10	A. I think probably about 10/15 minutes after everyone came
11	I think "the fire", that should say:	11	in.
12	" was filling up the flat slowly. Each time we	12	Q. And were they well, were you, let's start with you

14	When you say "the door", is that the front door?	14	your nose or lungs?
15	A. The front door, yes.	15	A. My nose was just a bit itchy from the inside, that's
16	Q. Do you remember, when the door was shut, whether there	16	about it. It just had an itchy, tingly kind of

18	A. From the bottom, yes.	18	Q. What about your throat?
19	Q. From the bottom of the front door?	19	A. My throat felt fine at that time.
20	A. Yes.	20	Q. And your lungs?
21	Q. Do you remember what the colour of the smoke was?	21	A. I didn't feel anything.
22	A. It was black.	22	Q. Could you still smell that electrical burning smell that
23	Q. Did the smoke have a particular smell or taste, do you	23	you described to us earlier, that you had smelt at the
24	remember?	24	beginning of this?
25	A. I can't remember, no.	25	A. I think at that stage it wasn't just an electrical
	Page 53	-	Page 55
1	Q. Do you remember how thick it was when it was coming in?	1	burning smell. You could smell there was a whole
2	A. When it started to come in, it was quite light, and as	2	load of different smells that were in the air. So
3	more and more smoke came in, I think it just sort of	3	I think there were like chemicals that you could smell,
4	filled up the air and made it darker.	4	you could smell like wood. So it was a mixture of
5	Q. So thin black going to thicker black?	5	different smells.
6	A. Yes.	6	Q. That's really helpful. Can you just give us a bit more
7	Q. Have I got that right?	7	on that? You say chemicals, wood anything else that
8	A. Yes, that's quite accurate.	8	you remember, you can pick out?
9	Q. How often do you think you opened the front door?	9	A. I guess probably metal. So it had like I don't know
10	A. I think, until the point where I couldn't see anything	10	how to explain it, but it's sort of like if you can
11	from the peephole, I stopped opening the front door from	11	taste sort of a sourness, kind of sourness in it's
12	then.	12	very difficult to explain the smell.
13	So I believe I opened it maybe about three/four	13	Q. No, I understand, it is. It is difficult. Okay,

17	peephole clearly anymore, so the only way for me to look	17	Q. A metallic sourness?
18	out was to open the door physically and pop my head out.	18	A. Exactly.
19	Q. When you did that, could you breathe?	19	Q. Right. I put that idea into your head, but is that
20	A. Yes. So I could breathe, but because of running around	20	right?
21	so much, even within the flat, I think I had got a bit	21	A. Yes, yes.
22	breathless. I don't know if that was to do with the	22	Q. Okay.

20	Q. Do you remember which window it was that you opened?	where I've seen windows, they're siliconed in or
21	A. Yes. So we opened the kitchen window and the living	something is there to but we had a gap, a very small

23	we had four windows in the living room.	23 Q. Could you feel air coming in through that gap?
24	Q. Okay.	24 A. I could hear it. I never felt it myself.

Coming back, then, to the night, do you remember whether any smoke came through the gaps that you've described under the windows in the flat? A. I didn't pay attention to it. I wouldn't have noticed. 3	Q. Did they look like they were dressed to leave or did	3	A. Yes. I would say it was 999 that she called, because

How long after that conversation did you make the decision to leave that you've just described, do you think? A. Probably about 10/15 minutes. Yeah. Q. Can you tell us whether the advice that you got from the firefighter had in any way influenced your actions	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	 Q. Yes. A. And she didn't have an answer for me. She just said, "Stay calm", and at that point I just thought: things aren't they're not going to get here in time. Q. Is that Mojda Habib? A. Yes, that's right. Q. I think, given what you've just said, perhaps we can look at your second exhibit to your second witness statement. I'll just give the IWS reference so we can get it up on the screen: it's IWS00001134. This exhibit is dated 16 October, so just two days ago. A. Yes. MR MILLETT: You exhibited it. This is an extract of your WhatsApp messages with Mojda Habib. I don't want to look at the first page. I'd like to pick it up at the second page of the exhibit, if we can. Before we do that, I should just say, there is at the top of this extract, Mr Chairman, the bottom of a picture which does show flame on the exterior of the

4	If we could pick this up at the top of this extract.	4	Q. Did a call come into you which you took?
5	This is, just so we're clear, Mr Neda, an extract	5	A. Yes. There were several calls with her brother-in-law.

7	A. Yes.	7	which the phone was handed to the firefighter?
8	Q. When you were receiving WhatsApp messages from Mojda?	8	A. Yes.
9	A. Yes.	9	Q. Right. Okay. That's very helpful.
10	Q. She was outside the building, was she?	10	When you made your decision, as we have been
11	A. No, not herself; her brother-in-law was outside.	11	discussing, to leave, did you have any thoughts about
12	Q. Okay.	12	how you were going to get through the lobby to the

16	That's you sending her a message, is it?	16	was getting dry, it kept on drying out, so we had to
17	A. Yes.	17	keep re-wetting our towels and whatever we were using.
18	Q. The green is you sending her a message?	18	So I remember I re-wetted my sweater, wrapped it
19	A. Yes.	19	around my head and I just thought I'm just going to take
20	Q. Okay. So we can time the black smoke around the noses	20	a deep breath in and hold my breath and go as far as

3	Would that be about the time when you started asking	3	A. Yes.
4	Mojda, "Is there any hope?"	4	Q. Did you have any thoughts at the time you decided to

7	Q. How long after this do you think you made your decision	7	A. I thought that there was just no other way to get

19	Q. No. Indeed, if you look down the page, Mojda says:	19	Q. Are you sure about that?

8	A. Yeah. I think even if I would've kept my eyes open,	8	A. No. Like I was coughing, every couple of seconds I was

No. There were hoses during the descent, but no firefighters themselves. It looked as though the hoses had just been placed there. I don't think they had been used because they were still flat. But, yeah, no firefighters at all. Q. What about the floor, was it wet or dry? A. I think it was dry. Yeah, I don't think it was wet because I remember at one point we tripped over, and when I had touched the floor, I couldn't feel any wetness. Q. Do you recall any point in your descent when, just perhaps for a few floors, it got hotter? A. No. Q. Do you remember seeing any other occupants of the building coming down the stairs? A. Not coming down, no. Any person that we came across was already dead on the stairs, or they were about to pass away. Q. And you describe that in your statement. So when we the way I had come about to see the door was we had tripped, and whilst on the floor, because it was a lot clearer down under, at the bottom area, I just noticed the door was a bit open, like halfway open. Because at that point I think my sweater had fallen off, and I couldn't get it back, so I just needed some sort of air. I think he tried to look for the number on the floor, to see what floor we were on, and he couldn't see that. He asked me if I knew what floor we were on and I told him I don't know either. Q. Did he have a torch with him, can you remember? A. I can't remember. Q. So you got down low, does that mean near the ground you could A. Yes, near the ground it's a lot less smoke, so at that

I want from you justice. I turned to my wife, Ferzana and just said 'I feel sick'. I just knew something was not right. The fact that the kitchen was on fire was not normal. already out of the Tower with his family. He told me they were taking him to Kensington Leisure Centre. He didn't explain the severity of the fire on the phone but perhaps he might have not known at that point or didn't want to worry me. I said goodbye to my wife, ran down the stairs, opened the front door and ran to the car."

Paragraph 9, picking it up there, he says: "9. Mariem called me at 1:48AM but this was only a five second call and I can't remember the conversation. Mariem called again at 1:49 AM and this was for a minute. I think this is when she told me that she had tried to go down the stairs but couldn't as there were others going back upstairs and were telling her to go back up. I don't know how far down the stairs she went. She said that the neighbour in Flat 205 had let her and my mum in. Flat 205 was on the 23rd floor, on the floor above my mother. It seemed odd to me because fires never spread in Grenfell Tower. We had experienced fires over the years and they never spread to the nearby flats and so I was thinking, 'What the hell is going on?' I said to Mariem 'I am on my way. Is mum with you?' She said that she was. I tried to reassure Mariem by telling her that Mohammed Rasoul and other residents that I knew were out of the Tower safely. I also told her that the firemen were on their way.

"12. Mariem called me at 2:13 AM. This was a three minute call and I think this was when I was running down the road to get to the Tower. I can't remember this conversation.

"13. When I got to the top of Sirdar road I could see the East side of the Tower. I was completely shocked. The fire was raging. I had never seen anything like it before. It looked like a movie. I couldn't believe that it was real. I could clearly see where the fire had started. At that point the fire had spread diagonally from the side that it had started. The fire was spreading so quickly. It was as if the whole tower was covered in tissue paper because of how fast it was spreading. I was horrified. From the East side of the Tower, I could see my mum's kitchen and part of the living room was completely on fire. As I looked at the fire, I made an immediate judgment call that if my family didn't try to get out, then they were going to die. I knew then it was going to be a case of them dying inside their flat or to die trying.

"Inside the fire command vehicle

"14. I started to run down Grenfell Road and suddenly a police officer tried to stop me from running any closer to the Tower. I was waving my phone at him shouting something along the lines of 'My sister is in

"10. Having received a phone call from Mohamed and Patrick, I knew there was something seriously wrong. I got into my car and I took the A40, A406 route from Hendon towards Grenfell Tower. As I got closer to the Tower I noticed that the traffic had started to increase significantly. I got there at 2.13am. I know that as I called my sister. I was approaching the area by Stoneleigh Road but it was gridlocked from there. I remember seeing Ambulances, Fire Engines, Police Cars, and normal vehicles, which I presumed belonged to other relatives or friends who were rushing to get there, as I was. I found a space as soon as I turned into Stoneleigh Road and I parked the car. I called my sister and said, 'I'm here just hold on.'

"11. I drove down Saint Anne's Road which was already packed with cars and there were lots of people standing around on the pavements. I turned right and parked at Stoneleigh Place as it was the first parking space I could find. I couldn't drive down any closer to the Tower because there were so many police cars, ambulances and fire engines around. I started sprinting down Stoneleigh place onto Sirdar Road. As I was sprinting, it felt like I wasn't even moving. I was freaking out.

there! My sister is in there!' I can't remember what the police officer said but I believe he told me to go with him or at least directed me to where I should go. I could see firefighters with hoses spraying the water at the Tower."

Picking it up at 15, he says:

"15. The policeman took me to what I could only describe as a fire command vehicle. I do not know if it was the closest emergency vehicle, but it was on Grenfell Road, where my sister used to park her car.

"16. Inside the fire vehicle, I was standing in a really confined space with one other fire fighter and policeman. We both stood next to each other and he was the only firefighter I spoke to that night. I don't know what his name was. The firefighter was holding a board which had all the floor numbers and flat numbers in the Tower. I am unable to confirm whether this board contained the layout of floors and flats pre or post refurbishment. My initial thought was he had taken it from the reception in the ground floor of the Tower but then I realized at a later date they only had that board on the ground floor by the lifts before the refurbishment on what was known as 'Street' level. He was analysing the board. At this point, I realised how unprepared the Fire Brigade were. It was clear that the

He asked does she have a wet towel? 10 needed to move further back away from the Tower. I told 11 Can she block smoke coming in and so on. Mariem sounded 11 them 'I know that you can't help me but can you at least 12 like she was cooperating because she would say 'hold 12 leave me to talk to my sister whilst looking at the 13 on', but I really do not know what she was doing because 13 Tower'. I asked if 15 wasn't moving from this spot so they agreed and left me there was anything else as it just did not sound enough 16 16 there.
