11	RICHARD HIPPEL (affirmed)	11	is that right?
12	Questions by COUNSEL TO THE INQUIRY	12	A. Yes.
13	SIR MARTIN MOORE-BICK: Good morning, Mr Hippel. Thank you	13	Q. You're currently a firefighter at Kensington fire
14	for coming along. Make yourself comfortable.	14	station?
15	Mr Millett will ask you some questions and explain	15	A. I am.
16	about the material before you.	16	Q. You've been there for I think is that right?
17	Yes, Mr Millett.	17	25 years?
18	MR MILLETT: Good morning, Mr Hippel.	18	A. Yes.
19	A. Morning.	19	Q. And firefighter was your rank as at the night of
20	Q. Could I say, first of all, thank you very much for	20	14 June
21	coming to the inquiry and assisting us with our	21	A. Yes, it was.

13	Shepherds Court fire?	13	Q. Right. Okay.
14	A. I have looked at pictures of the Shepherds Court fire.	14	Was it near a hydrant? Did you park near a hydrant?
15	Q. In what circumstances did you come to look at pictures	15	A. I don't know.
16	of the Shepherds Court fire?	16	Q. Did you look for a hydrant?
17	A. I looked at the document that was introduced in	17	A. Not myself, no.
18	Mike Dowden's testimony earlier in this inquiry.	18	Q. Did anyone in your cab look for a hydrant?
19	Q. But before that?	19	A. I don't know; we were up and out.

23	A. Yes.	23	A. Possibly.
24	Q. Anything else?	24	Q. Is that right?
25	A. No.	25	A. Possibly, I don't know.

1	Q. Right.	1	Q. Right.
2	Going straight to your attendance at Grenfell Tower	2	Can you recall how easy it was to access the tower
3	on the night of the fire, were you aware from your prior	3	in terms of congestion of parked traffic?
4	knowledge of Grenfell Tower, such as you describe, that	4	A. The road with the parked cars was a fire engine's width,
5	this was a building with a stay-put policy in place?	5	so it was quite tight getting down there.
6	A. No, I was not.	6	Q. Did that slow you down, do you think?

22	Q. Now, we've checked the short incident log and it has you	22	First of all, when you say, "I could see the tower
23	confirming arrival in other words, status 3 at	23	as we approached the entrance", do you mean on foot or
24	01.08.33.	24	while you were still arriving in your appliance?
25	A. Mm-hm.	25	A. On foot.

21	A. He was as well.	21	Again, is that the same location, do you think?
22	Q. He was as well?	22	A. It is, yes.
23	A. Yes.	23	Q. Now, can you tell us what the colour of the smoke you
24	Q. Now, I just want to ask you some questions about these	24	saw was, do you remember?
25	wisps of grey smoke coming out of silver slatted vents	25	A. It was pretty much white. Almost like steam-like. So,
	Page 9		Page 11
1	you said you see above the main entrance door.	1	yeah, it was a very white colour.
2	I wonder if you can help us by looking at	2	Q. How dense was it, do you remember?
3	a photograph.	3	A. It was quite wispy, yeah, it wasn't it was like
4	A. Yes.	4	something was venting out of there, a light smoke.
5	Q. Can I ask for BLA00004531 to be shown.	5	Q. Okay. Was it being propelled out with some force or was
6	This is a photograph of the south side of	6	it just drifting out?
7	Grenfell Tower, just above the entrance, which one of	7	A. No, it wasn't coming out with force, but it was enough
8	the inquiry's experts, Dr Barbara Lane, took in her	8	that I noticed it as I was walking up, it caught my

16	A. From the vents that you can see just above the windows.	16	Q. Okay.
17	Q. Right. Those slatted vents?	17	Did you hear any sounds of ventilation or fans?
18	A. Yes.	18	A. No.
19	Q. How sure are you about that?	19	Q. When you got into the lobby, did you see any smoke in
20	A. I'm sure, yeah.	20	the lobby?
21	Q. Right.	21	A. No.
22	Let me just show two or three more pictures to you	22	Q. Could you hear any sounds of ventilation or fans in the

I had a handheld radio on me, but it was switched off.  Q. Why?  A. Because they're not intrinsically safe and we were thinking about going into a fire.  Q. Not intrinsically safe why is that?  A. So they can create sparks in an explosive atmosphere and create an explosion, so you would turn them off.  Q. Is that practice, that a firefighter going up to commit  A. For their handhelds.  Q. For handhelds?  A. Yes.  Q. Did you have a BARIE radio with you?	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	window because he couldn't get hold of the crews.  Q. Do you know why Crew Manager Secrett couldn't contact either BA crew?  A. I don't know that.  Q. You say he then denied the message; did you see him make radio contact with the outside of the tower?  A. I heard him make contact, yes.  Q. You heard him?  A. Yes.  Q. Did you hear him get any confirmation back?  A. I can't remember but I would assume he would've done, yes.  Q. Did it surprise you that he couldn't make contact with the BA wearers who had been committed?  A. No, not at all.  Q. Whose radio was it that you heard the confirmation come back over?  A. What, confirmation from outside?  Q. Yes.  A. I don't remember him confirming outside that they

I don't know how he contact whether it was through his own radio or more likely through Alex De St Aubin.  Q. What radio comms equipment did you have on you?  A. I had a handheld radio on me, but it was switched off.  Q. Why?  A. Because they're not intrinsically safe and we were thinking about going into a fire.  Q. Not intrinsically safe why is that?  A. 1	Now, you then say in your statement, in the third	1	that sound about right to you?
2	paragraph on page 3:	2	A. Yes, that sounds about right.
3	"A few seconds later Kensington's officer in charge,	3	Q. You went under air, did you, as soon as you left the

11		11	A. I don't remember. I can't remember there actually being
12	A. I don't think anything had changed at all; it was just	12	any hose at the bridgehead at that point.
13	a different perspective he had to Crew Manager Secrett.	13	Q. What about a branch?
14	Q. Had other crews arrived by that point?	14	A. No branch, no. Same thing.
15	A. No.	15	Q. Would that be normal, to go up as a backup crew to two

18	In summary, he says that he committed you and Crew	18	up there, they'd be running two lengths of hose out by
19	Manager Stern initially as hose management. Do you	19	then. So at that point we would be purely to back them

21	A. I don't specifically remember him saying hose	21	Q. Now, you say at the end of the third paragraph on

23	Stern. My general brief was to go and back the crews up	23	"The stairwell was clear and visibility was good,

1	Q. Do you remember whether you got any kind of deployment	1	Pausing there, when you made your way up, did you
2	briefing from Watch Manager O'Keeffe?	2	count the floors by reference to anything?
3	A. Just to go and back the crews up.	3	A. It was two floors, yeah.
4	Q. Right. Which floors did that require you to go to to	4	Q. Did you noticed whether the floors were numbered?
5	back them up?	5	A. I didn't notice because it was just two floors, so it
6	A. Well, initially the fourth floor, yes.	6	was a case of going up two flights of stairs.
7	Q. The fourth floor.	7	Q. Now, you then say in the last paragraph on page 3:
8	A. Yes.	8	"I got to the 4th floor and entered the lobby from
9	Q. What would that involve, or what did you understand at	9	the stairwell, there was some smoke in the lobby and the
10	that time it would involve?	10	crews had made entry to the fire flat."
11	A. For me, personally, just to go up there and see whether	11	Do you know where the smoke in the lobby had come

13	it's hard to work hose through flats, any building, see	13	A. I'm assuming from the fire flat, yes.
14	if they were getting tired and needed to be replaced at	14	Q. Did you notice any smoke coming from anywhere else?
15	the branch, and generally sometimes knocking up doors	15	A. No.

17	upstairs and below the flat below the floors to see	17	lobby on the fourth floor?
18	if there's been any fire spread.	18	A. I didn't see any, no.
19	Q. Right.	19	Q. You didn't, okay.
20	Now, we have the BA telemetry data, and I don't need	20	Did you know that there was an AOV system in place
21	to take you to it unless you want to see it, but we have	21	at Grenfell Tower?
22	the data showing you and Crew Manager Stern tallying out	22	A. I didn't, no.
23	at 01.17 or so.	23	Q. You go on to say that you saw Firefighters Badillo and
24	A. Mm-hm, yes.	24	O'Beirne in the lobby, but not wearing BA.
25	Q. The seconds are different but it is about 01.17. Does	25	Did you know that Firefighters Badillo and O'Beirne

3	Q. So nobody told you; is that right?	3	information that there was smoke on the fifth and the
4	A. No.	4	sixth.
5	Q. Did it surprise you?	5	Q. Who told you that information?
6	A. No, not at all. It's quite common practice for	6	A. I'm not 100 per cent sure.
7	firefighters without BA to be facilitating hose and	7	Q. Do you know where that information came from?
8	setting gear up and yes.	8	A. It would've been from a firefighter.
9	Q. Right.	9	Q. A firefighter who was with you at the time?
10	Now, you say that well, let me ask you, rather	10	A. Again, when you're in a BA set, you become very insular.
11	than putting words in your mouth.	11	You lose your peripheral vision, you lose a lot of your
12	Where were Firefighters Batterbee and Brown at this	12	hearing, so you get information when you're looking at
13	stage, the first BA crew, do you remember?	13	something and it's sometimes hard to tell who is giving
14	A. They would've been in the fire flat.	14	you that information. It could've been shouted down the
15	Q. In the flat. What about Firefighters O'Hanlon and	15	stairs. So it's hard to tell. I just remember having
16	Barton?	16	that information.
17	A. In the flat as well.	17	Q. Given that you had no operating handheld radio and no
18	Q. So all four of them were in the flat?	18	BARIE set, would it be right that you must have heard it
19	A. Yes.	19	from a voice
20	Q. So we can put all four of them in the flat at some point	20	A. Yes, it would've been someone shouting and it would've
21	after 01.17?	21	been a firefighter.
22	A. Yes.	22	Q. Okay. Right.
23	Q. Right.	23	You say it would've been a firefighter; what about
24	You I think recall some smoke coming from the door	24	the possibility of it being an occupant of the building?
25	to flat 16 into the lobby. Can you describe the smoke	25	A. I wouldn't have thought so, no. At that point, I hadn't
	Page 25		Page 27

1	for us?	1	seen any occupants.
2	A. It wasn't a lot, just a little bit of black smoke.	2	Q. Now, you then say at the top of page 4 "CM STERN and
3	Nothing to concern us to be in the lobby.	3	I decided to go up and have a look".
4	Q. Do you remember whether it was logging or whether it was	4	At that stage, do you know whether any of the other
5	dispersing?	5	firefighters had actually been further up in the tower
6	A. It was dispersing, really. As I say, the lobby was	6	to see what was going on?
7	pretty clear of smoke, so there was minimal smoke coming	7	A. I didn't, no.
8	out of the door of the flat.	8	Q. Just to be clear, you say in your statement that you
9	Q. Right. So my next question may be obvious, but you say	9	were told that there was smoke on the fifth and sixth
10	it was dispersing; how and where was it dispersing to?	10	floor.
11	A. Well, it would be dispersing within the lobby area, and	11	Was it restricted to smoke or do you remember
12	possibly the lobby door was propped open with a hose.	12	whether there was anything more reported?
13	But there was little smoke coming out.	13	A. No, it was just smoke.
14	Q. Right. Given that Firefighters Badillo and O'Beirne	14	Q. You're clear about that?
15	were not wearing BA, do you remember how respirable the	15	A. Yes.
16	air was in the lobby at that point?	16	Q. Right.
17	A. For them, they were having no problems at all.	17	You then say "CM STERN and I decided to go up and
18	Q. Now, you then say, at the bottom of page 3 of your	18	have a look". Was there a discussion between you and
19	statement:	19	Crew Manager Stern?
20	"We were informed that there was smoke on the 5th	20	A. All of our decisions that night were made together. It
21	and 6th floor."	21	was usually one would suggest it and other one agree.
22	And just to be clear, is this while you were all	22	I can't remember who made those decisions, who first
23	standing in the fourth-floor lobby that you got this	23	initiated it, they were all done together.
24	information?	24	Q. Right.
25	A. I almost immediately that I got to the fourth-floor	25	When you made that decision, you didn't have radio,

1	as you've told us, but did Crew Manager Stern	1	Q. Can I just mention for the record the transcript
2	communicate your decision with him to go up and have	2	reference, which is 6 July at pages 35 to 37. I do that
3	a look to anybody else?	3	so we can find it later.
4	A. I couldn't tell you that.	4	But you don't remember or you're sure you didn't.
5	Q. You don't remember him radioing or trying to	5	Okay.
6	A. I can't remember. It was literally because it was	6	Do you remember having a discussion at all, or
7	5 seconds from that floor to the next floor, all	7	whether Crew Manager Stern had a discussion at all, with
8	I remember is hearing the call that there's smoke on	8	Watch Manager O'Keeffe about your decision to go up to
9	there and then 5 seconds later we were upstairs on the	9	the fifth and sixth floors to look?
10	fifth floor.	10	A. As I said, I didn't. It's possible that Crew Manager
11	Q. When you made your decision, do you remember where	11	Stern spoke to him on the radio.
12	Firefighter Justin O'Beirne was?	12	Q. You then say in the third line of the first paragraph on
13	A. No. At that point, everyone was running around, and	13	page 4:
14	again, as I say to you about being in a BA set, it's	14	"When I got to the 5th floor I could see that there
15	hard to see people when they're running around, so it	15	was some smoke coming from the flat directly above where
16	was just people running up and down, doing their stuff.	16	the fire flat had been on the 4th floor."
17	Q. Now, you then say, first sentence of the first main	17	Did that alarm you?
18	paragraph on page 4:	18	A. Not overly.
19	"I made my way up the stairwell to the 5th floor in	19	Q. What did you think was happening?
20	company with CM STERN, FF BADILLO and DO O'BEIRNE. "	20	A. Either we've got smoke travel up from the floor below or
21	I don't know what the "DO" stands for:	21	we've got fire spread up from the floor below.
22	"FFs BADILLO and DD O'BEIRNE"	22	Q. Would fire spread up from the floor below not alarm you?
23	What is that, "DD" or "DO", can you help us?	23	A. No.
24	A. Sorry, where is that?	24	Q. Why not?
25	Q. In your statement you call him DO O'Beirne and then	25	A. Because I have been doing this for 30 years and this is
			,
	Page 29		Page 31
1	DD O'Beirne.	1	what I'm used to.
2	A. That's a typo.	2	Q. Right. Okay.
3	Q. Can we call him firefighter?	3	When you get to the fifth floor, you say there was
4	A. That should be firefighter, yes.	4	some smoke. Could you describe that smoke for us?
5	Q. " were still without BA and were not having any	5	A. At the fifth? Again, it was quite white and it was
6	issues breathing as the stairwell was clear."	6	coming out from around — the door was shut and it was
7	Now, the fact that Firefighters Badillo and O'Beirne	7	coming out from around the door frames. There wasn't
8	were going up without BA, did that concern you, given	8	a lot of smoke. It was yeah, quite grey. But you
9	that there were reports of smoke on the fifth and sixth	9	could see it seeping out.
10	floors that you were going to investigate?	10	Q. Right.
11	A. No, they're competent firefighters. We all know how to	11	You say it was coming out from the bottom of the
12	keep safe when there's smoke around without BA on.	12	closed door.
13	Q. Right.	13	A. And from all around, and from the sides and the top. It
14	Now, when Watch Manager O'Keeffe came to the inquiry	14	was seeping out. It didn't look like it was coming out
15	to give evidence, he said again, I'm summarising the	15	under pressure.
16	gist of what he said — that after he had committed you	16	Q. Did you have a thought at the time about whether that
17	and Crew Manager Stern for hose management, you came	17	door was properly smoke-sealed?
18	down to the bridgehead to tell him about reports of fire	18	A. No, I didn't personally, no.
19	on the fifth floor. He then asked you to go up and tell	19	Q. In your experience, if smoke is coming out of a door
20	him more about what was going on?	20	like that, what would that indicate to you about whether
21	A. I don't remember coming down to the bridgehead.	21	that door was properly smoke-sealed or not?
22	Q. You don't remember coming down?	22	A. Well, clearly, if smoke's coming out then it hasn't
23	A. No. I'm sure we didn't.	23	sealed.
24	Q. You're sure we didn't?	24	Q. Did you notice when you arrived at the fifth floor any
25	A. Yes.	25	particular change in temperature?

	Page 30		

		Т	
1	A. No.	1	Q. And that decision to change that role was yours; it
2	Q. What about visibility in the fifth-floor lobby?	2	didn't come from anyone who'd instructed you?
3	A. Visibility was fine.	3	A. It was a decision that we all made that were on the
4	Q. Right.	4	fifth floor. We between us decided we were going to set
5	You said the smoke was "quite grey". Was it towards	5	a jet up and that we were going to get ourselves into
6	the black end of the spectrum or the white end?	6	that fifth-floor flat.
7	A. No, towards the white end, yeah.	7	Q. Was that decision communicated in any way, to your
8	Q. Okay.	8	knowledge, either to Brien O'Keeffe at the bridgehead or
9	What would that have indicated to you in terms of	9	Mike Dowden on the incident ground outside?
10	what was combusting?	10	A. Not to my knowledge, but I expect it would've been.
11	A. That there wasn't well, it's hard to tell until you	11	Q. You expect it would've been?
12	get into the flat because the fire could be a distance	12	A. Yes.
13	away from the front door, so it's speculation and	13	Q. Why would you expect it would've been?
14	Q. Right.	14	A. Because it was information that they need to know, that
15	Now, when you go into the fifth-floor lobby, who	15	we've got a suspected fire up on the fifth floor now.
16	comes with you?	16	Q. Right.
17	A. Again, I can't be certain. I know Crew Manager Stern	17	To your recollection, did you see or hear anybody
18	was there. It is possible Dave Badillo and	18	communicating that decision to the bridgehead or to the
19	Justin O'Beirne, and possibly Chris Dorgu as well. But	19	fire ground?
20	I can't tell because it was such a short period and	20	A. I didn't. It was literally 20 to 30 seconds that all
21	everyone was running in and out and up and down.	21	this was happening.
22	Q. Now, you say in the next sentence in virtually the	22	Q. Right. So is the answer to my question no?
23	middle of page 4:	23	A. No, yes.
24	"We decided we would set up another firefighting jet	24	Q. Fine.
25	from the dry riser on the outlet of the 5th floor and	25	You then say, in the next sentence, that you had two
	Page 33		Page 35

2	That decision, was that part of your role as	2	" so someone called up on the radio for one to be
3	a backup crew that you've been tasked with?	3	brought up to us."
4	A. Not necessarily. You tend to do things as and when	4	Following on from my last set of questions, do you
5	you're able to do them. So at the moment we weren't	5	remember who it was who had called on the radio?
6	necessarily needed down on the fourth floor, so you make	6	A. No. And it might have been that they actually went down
7	yourself useful when something more important comes	7	the stairs to get one, I don't remember, I just remember
8	available.	8	that we didn't have a branch, so one of the firefighters
9	Q. Right. Okay.	9	without BA sorted it out. They either radioed down or
10	If it was part of your role to do that and to fight	10	they went down themselves to get it.
11	a fire, why did you not come up with a branch, ready to	11	Q. Your statement says, "someone called up on the radio for
12	do that if that was part of your exercise?	12	one to be brought up", I just want to test how strong
13	A. Because we were initially sent to back the crew up.	13	that recollection is.
14	Q. So your role as backup crew changed?	14	A. So, as I said, it could've been someone went down to get
15	A. Yes, our role throughout the night changed, and that's	15	one, so I'm not sure. I just know we tried to get
16	the flexibility that you need to change at times.	16	a branch.
17	Q. So is this right, just to summarise tell me if this	17	Q. Okay. You then say:
18	is wrong when you get to the fifth floor, you see the	18	"While we were waiting CM STERN and I decided we
19	smoke coming out of flat 26, the flat immediately above	19	should go and have a look at the 6th floor to see what
20	the fire flat that you were originally tasked to back	20	was happening there as smoke had been reported there as
21	up, and your role changes from being backup to active	21	well."
22	firefighting?	22	What reports are you talking about here?
23	A. Yes.	23	A. From the initial, when we were on the fourth floor, to
24	Q. So you then look around for firefighting equipment?	24	say that there was fire on sorry, there was smoke
25	A. Yes.	25	reported on the fifth and the sixth.
	Page 34		Page 36
	1 450 51		1 460 30

1	Q. To be fair to you, can I just capture this in terms of	1	A. Because at that point again, the same as on the
2	your contemporaneous recollection.	2	fourth floor I'd literally walked into the got to
3	Could you just look at your contemporaneous notes,	3	the fifth floor, two lengths of hose had been bowled out
4	please, which is MET0005209.	4	and they said, "We got no branch", so then me and
5	Halfway down that page, you say, now at the top of	5	Jamal Stern went up to the sixth floor.
6	the screen:	6	Q. Only when you look at your statement, you say, "While we
7	"As we were doing so [this I when you're on the	7	were waiting". The impression given there is you were
8	fourth floor] we were informed of smoke on the 5th and	8	hanging about a bit.
9	6th floor."	9	A. No, when I mean waiting the decision we knew it
10	So your information or recollection at the time was	10	would be a minute or so before we got a branch up, so we
11	that you were told of both floors	11	decided in that minute we would pop upstairs to the
12	A. Yes.	12	sixth and see what was going on up there.
13	Q having smoke on them?	13	Q. Oh, I see.
14	A. Yes.	14	A. So it's not a minute of waiting; it's as soon as the
15	Q. Right. Okay.	15	decision that we haven't got a branch, then we decide
16	So it's the same source of information?	16	we're going to go up because we know there's going to be
17	A. The original one when we were on the fourth.	17	someone running up two flights of stairs with a branch,
18	Q. Just to go back a minute to the sentence in your	18	and that will take them 30 seconds. So that's the wait.
19	statement in the first paragraph, page 4, you say:	19	Q. So you use the waiting time to look at the sixth
20	"While we were waiting [for the hose] CM STERN and I	20	floor
21	decided we should go and have a look at the 6th	21	A. Yes.
22	floor"	22	Q not to make the decision to go to the sixth floor?
23	While you were waiting, did you knock on the door of	23	A. Yes.
24	the flat where smoke was coming out?	24	Q. Got it.
25	A. No. Literally this happened within 15 seconds,	25	Now, then, you then say in the last sentence of the
	Page 37		Page 39
1	20 seconds, so we realised we didn't have a branch and	1	first paragraph on page 4:
2		2	"We then went up the stairwell to the 6th floor, I
3	then we decided to go upstairs to have a quick look	3	can't remember who initiated our actions as we work
4	upstairs. Q. Did anybody communicate, either to the bridgehead or to	4	together as a pair bouncing ideas off each other and
5	Mike Dowden outside, "There's a fire in flat 26"?	5	most of our decisions were agreed jointly."
6	A. Again, as I said earlier, I didn't hear that or see	6	The "we" there is, I'm assuming, Crew Manager Stern;
7	anyone do that, but I assumed they would.	7	is that right?
8	Q. You assumed they would?	8	A. Yes.

When you then go up to the sixth floor and this covered in the second main paragraph on page 4 of your statement you say: "On the 6th floor, I opened the door to the lobby and found it completely filled with thick black smoke with zero visibility. In nearly 30 years of service I have never seen smoke like that in a domestic property fire. The closest equivalent I can equate it to is the thick black smoke you get from car tyres as the burn."  Just pausing there, on that first journey up from the fifth to the sixth floor, did you pass anybody on the stairs?  A. No. Q. Did you see any firefighters? A. No. Q. Did you see any residents? A. No. Q. What were the conditions on the stairs like? A. Clear, clear.	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	the screen.  Did smoke remain in the stairwell once you'd closed the door?  A. I didn't notice any smoke into the stairwell at all.  I mean, it was literally I opened it, looked at it for 3/4 seconds, shut the door straight away.  Q. I see.  When you did that opened the door and then closed it again were you with anybody?  A. I was on my own.  Q. Right.  Did you know whether anybody had gone into the smoke on the sixth floor?  A. At that time I didn't, but afterwards I learnt Crew Manager Stern had actually gone in there before.  Q. Okay. Did you think you were on your own?  A. At that point, yes. At that point I was on my own.  Q. Let me just try and explore just a little bit. You say in the previous paragraph:  "We then went up the stairwell to the 6th floor"  That gives the impression that you go up together.  How did you actually go up?

1	mechanism as I understand it now is that me and him	1	What thoughts did you have about yourself going up
2	agreed that we were going to go up to the sixth floor.	2	to the sixth floor to fight the fire on the sixth floor?
3	As we left, I got distracted by the gentleman opening	3	A. Well, at that point, I'd be looking to fight the fire on
4	his door. Crew Manager Stern didn't see that; he	4	the fifth floor because the jet would've already been
5	carried on up. He went up to the sixth. When he went	5	that's what I'd hope by then, at that point the branch
6	to the sixth, he opened the door and the smoke was down	6	had come up and we'd be ready to go into the fifth

8	and could see smoke coming out of the door on the sixth	8	Q. Right.

10	He decided he was going to go and look in that flat.	10	going to put to you something that Watch Manager
11	When he opened the door fully, the lobby must have	11	O'Keeffe recalls. He recalls receiving a message from
12	flooded with smoke, and that was the point I then came	12	Crew Manager Stern saying, "It's fucked, it's going,
13	up, opened the door, shut it immediately. I went back	13	it's completely smoked out on this floor".
14	downstairs again and he came out after that and came	14	Does that trigger a recollection in your mind about
15	back downstairs.	15	a message being sent by Crew Manager Stern to Watch
16	Q. Now, your description just now of his experience isn't	16	Manager O'Keeffe?
17	something that you experienced.	17	A. I believe that message was actually later on in the
18	A. From my experience, I went up there on my own, opened	18	evening and it was a message that I gave to him
19	the door up, realised it was smoke-logged, shut the door	19	face-to-face.
20	and come straight back down again.	20	Q. A message that you gave to who face-to-face?
21	Q. Okay. We can ask him about what he experienced, but	21	A. Brien O'Keeffe.
22	I think what you are telling us is that he went up ahead	22	Q. At what point?
23	of you and you went up afterwards?	23	A. When I debriefed him after coming down the 16th floor.
24	A. Yes.	24	Q. Ah, okay.
25	Q. Now, you then say that you decided to go back down to	25	A. I remember distinctly saying that.

2	paragraph.	2	out on this floor, do you?
3	Did you make that decision with Crew Manager Stern	3	A. I remember distinctly saying, "Brien, it's fucked, the
4	together?	4	floor's fucked".
5	A. No, I was on my own at that point.	5	Q. Which floor were you referring to?
6	Q. When you say "Crew Manager Stern and I decided", it	6	A. I was talking about the 16th floor at that point.
7	looks as if you are describing a joint decision.	7	Q. So O'Keeffe remembers getting a message from Stern
8	A. That's a mistake then, I was on my own.	8	saying, "It's fucked" in reference to the sixth floor;
9	Q. You were on your own, you shut the door and you decide	9	you remember it being part of a face-to-face debrief
10	yourself to go back down to the fifth floor.	10	about the 16th floor?
11	A. Yes.	11	A. Yes. Crew Manager Stern doesn't talk like that;
12	Q. What were you going to go down to the fifth floor to do?	12	unfortunately I do!
13	A. Well, hopefully at that point the branch would've turned	13	Q. That's the sort of evidence we like to have!
14	up and myself and Crew Manager Stern had made entry into	14	I don't know where to go from there!
15	the fifth floor. We'd also then reported that the sixth	15	Right, so you get back to the fifth floor with
16	floor needed another jet to go up to fight whatever was	16	Stern, and you say you found a branch had arrived, and
17	happening on the sixth floor.	17	that's the last paragraph on page 4.
18	Q. Now, you say "We'd also then reported that the sixth	18	You say:
19	floor needed another jet"; do you remember who sent that	19	" the hose was set up and another BA crew had
20	message?	20	arrived at the 5th floor and were getting ready to make

22	Q. Do you remember a report that the sixth floor needed	22	breaking the door down."
23	another jet or are you assuming that?	23	Do you remember who the BA crew was?
24	A. I assume that, yeah, I don't remember that.	24	A. At the time, I didn't know who the crew was.
25	Q. Okay.	25	Q. You didn't recognise them?

1	What did that tell you, seeing that smoke, about the	1	Q. Okay:

3	A. Nothing for definite, just told me that there was the	3	Is that what it says?
4	same smoke that was on the sixth floor.	4	A. Yes, "who said there's someone in there".
5	Q. True, but did it surprise you to see so much smoke on	5	Q. Right.
6	the 16th floor, ten floors above	6	Now, you made these notes immediately after the
7	A. It did surprise me, yes.	7	incident.
8	Q. It having surprised you, did you have any thoughts about	8	A. Yes.
9	what might be happening to the building?	9	Q. Does that capture your recollection accurately?
10	A. Obviously different thoughts go through your mind, but	10	A. Pretty much. When I got up to the 16th floor, I may
11	not particularly did I think about it at that point, no.	11	well have been the first up there, because I don't
12	Q. Did you think about the speed with which the fire or	12	remember Jamal being up there. So when I got up to
13	smoke was moving up the building?	13	there, there was a teenager, maybe 15, 17, crouched in
14	A. It would've been possible, as I say, for it to for	14	the doorway, propping the door open. There was smoke
15	smoke to travel up a lift shaft, up the bin shafts.	15	coming out. I don't remember now him telling me that
16	Highly unlikely for the amount of smoke that was in	16	there was someone in there, but he may well have told me
17	there, so I knew there was something going wrong badly.	17	there was someone in there.
18	Q. Right.	18	Q. Right.
19	Now, you say that the lobby door was being held open	19	A. If I've put it in my contemporaneous notes then he
20	by a man, and you go on to say you subsequently learnt	20	probably did tell me there was someone in there.
21	he's called Sam. Then you identify him.	21	Q. When you got to the 16th floor, do you remember where
22	How clear are you in your recollection that the	22	Firefighter O'Beirne was?
23	first time you saw this man you identify as Sam was at	23	A. I don't remember seeing him up on the 16th floor at all.
24	the point at which you arrive at the 16th floor and go	24	Q. When you got to the 16th floor and saw this man, do you
25	into the lobby there?	25	remember where Crew Manager Stern was?
	Page 69	-	Page 71
1	A. Sorry, say that again.	1	A. I don't remember seeing him at that point, so I'm
2	Q. How sure are you in your recollection that the first	2	assuming he was behind me.
3	time you see Sam was when you arrive at the 16th floor	3	Q. Right.
4	and go into the lobby there?	4	You say in your statement:
5	A. I believe I've since learnt that the teenager that was	5	"He looked concerned [this the male you refer to as
6	there probably wasn't the gentleman that I know as Sam.	6	Sam] and I assumed he was the source of concern about
7	After the incident, I met up with another gentleman that	7	the person trapped but we didn't have any conversation
8	we did rescue out of there and we may have got our	8	with him about this."
9	stories crossed.	9	You say "we" didn't have any conversation; who is
10	Q. Right.	10	the "we"?
11	A. So at the point I made my police statement, I believed	11	A. I meant "we" as in a BA crew. As I say, I wouldn't be
12	that the gentleman that was propping the door open was	12	concerned by it.
13	Sam. I'm now led to believe it probably wasn't.	13	Q. But when you saw him crouching holding the door open
14	Q. Okay. I just want to get your unvarnished recollection	14	A. Yes.
15	of what you remember.	15	Q I think you told us you weren't with Stern or
16	A. Yes.	16	O'Beirne; that's right, is it?
17	Q. Perhaps we can go to your contemporaneous notes, then,	17	A. I didn't see him. He was probably just behind me. But,
18	first page. You say, three-quarters of the way down:	18	again, as I say, you are quite insular, you only see
19	"On getting to the 16th floor we found a man"	19	stuff straight in front of you and you concentrate, and
20	Then there's a little mark:	20	also to hear people, when you exhale out the breathing
21	" a man [something] by the door into the	21	sets, they make a lot of noise. So after coming up 12
22	lobby"	22	floors, you're trying to control your breathing so you
23	It looks like a deletion of the word "on" and then	23	can talk to people, you can hear people, so it's quite
24	you've put your initials; is that right?	24	hard. Having conversations with members of the public
25	A. Yes.	25	can be quite awkward.

My judgement at that point would've been it was safe to leave him there.  Q. But at the time, you didn't know what the air conditions were like in the relevant flat.  A. No, I would've had to have gained entry to that flat.  Q. And I think you've told us you didn't know even which flat it was?  A. No, and we would've had to have the keys. We wouldn't have been able to break the door down, because if we broke the door down, the smoke from the lobby would've definitely entered the flat and then we'd be searching for him in a smoke-filled flat.  Q. Now, in the first main paragraph on page 6 of your statement, you say in the second line:  " the visibility was zero, even when I put my hand right up to my face mask I couldn't see it the visibility was so poor."  What about temperature in the lobby, do you remember?

I mean, you've described what he looked like. Can you describe his hair?  A. Dark.  Q. What sort of hair style? I'm sorry to ask that question, but it may help.  A. It was possibly side-parted, but that's a fleeting memory.  Q. You then go on to say:  "Mr DAFFARN told me that Sam lived in a flat near his on the 16th floor with his father Joe who was bedbound and that Sam had come down to ask for help getting his Dad out."  That information that you got from Mr Daffarn I think I'm right in saying is much after the fire.  A. Yes, that was in a meeting we had in November time, I believe, between the fire and me having this police statement taken.  Q. Then you say:  "The full information didn't get through to CM STERN	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	knowledge that I had of what was going on with the fire, as long as he was safe and free of smoke, the flat was free of smoke, I would've probably left him there rather than bringing them out through a smoke-filled lobby and extricating him down 16 floors. My judgement at that point would've been it was safe to leave him there.  Q. But at the time, you didn't know what the air conditions were like in the relevant flat.  A. 4	What did you say to Alex De St Aubin?	4	Then you say at the top of page 9, while you were
5	A. Possible fire in that fifth floor flat and we needed	5	waiting with Richard Hippel for the equipment, you say:
6	I remember having a hose, so I needed some equipment	6	" someone again I can't remember who said that

Right. 3 When you went into the 16th-floor lobby, you say at 4 the top of page 11, six lines down you say: 5 " definitely we need to make a rescue here 6 because that smokes pretty bad. He was probably early 7 20s, late teens, I couldn't tell, his face was quite 8 covered." 8 A. To be honest, I was quite task-focused on rescuing San 9 And you go on to describe the man you say was there. 10 Again, how confident are you, having discussed your 11 recollections with me this afternoon, about whether this 12 man that you were seeing was actually on that floor? 13 A. Not confident. I remember seeing them at some point on 14 the stairwell. I can't quite place it, whereabouts. 15 Q. Then in the next paragraph, you say: 16 "Before we entered the lobby on the 16th floor, 17 I asked him where the flat was, he said TO THE RIGHT OF 18 THE DOOR." 19 Again, how well do you recall that conversation? 10 I your recollection? 2 A. No, it doesn't. It confuses me even more. 3 Q. I couldn't work out why there was so much smoke in the foyer with no heat. Again, the conditions didn't match up. I expected the conditions — the conditions I got in the flat made sense, maybe there was a fire in there, a lot of smoke, a lot of heat, but it just didn't add up in the foyer.  Q. Right. Okay.  You just described Richard Hippel knocking on doors. Do you remember which doors he knocked on?  A. So from where I was standing outside door 136, he carried on down that right-hand wall, so I'm assuming he would've gone to flat 135 and 134.  Q. Because the smoke was thick on that floor, could you see him at all?  A. No.  Q. Could you hear him?  A. I could hear him, yes.  Q. What was he doing?  A. Kicking doors, or he was banging the doors, either kicking them or hitting them extremely hard.  Q. Okay. Was he shouting?  A. I can't remember — I could hear his voice. I don't

3	Q. Did you yourself go round knocking on any of the doors?	3	I remember hoping he wasn't in the staircase because
4	A. No, I stayed outside door 136 until he came back.	4	I couldn't find his dad. I'm assuming that Justin
5	Q. Right. Okay.	5	O'BEIRNE had taken him down."
6	You say, I think, that you knocked on other doors.	6	Now, is that a thought you had at the time?
7	That's the second main paragraph on page 13, and this	7	A. Yes.

2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	A. Not that I can remember, no.  Q. Now, you get back to the bridgehead, and I think on page 15 of your statement you describe that at the top of the page. You say:  "We went back to the Bridge Head at this point I noticed a little bit sense of urgency now things had been going on whilst we were on the 16th floor, I shut my set down, told Brian O'KEEFFE what we had done and what we saw, I can't remember anything he said to me, I just remember Dickie was telling him some things."  Now, I've read that to you. I have a few questions about that evidence.  First of all, we have your end of wear time, just to put this in a time context of 01.38.40.  Would that be about right in terms of the time you'd spent under air?  A. Yeah, it must be if that's what the telemetry says.  Q. You say:	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. Yes.  Q. Given that experience, are you able to self-diagnose as to whether or not you might have been suffering from metabolic heat stress when arriving at the bridgehead?  A. No, because I was tired, I was hot, but it didn't take me out, so I was still able to go back, take off my set and carry on working again, so  Q. Now, you say in your statement in the second line of page 15:  " [I] told Brian O'KEEFFE what we had done and what we saw"  Do you remember where Brien O'Keeffe was standing when you spoke to him?  A. He was at the bridgehead. He was — the moment we come down the steps onto the second-floor lobby, he was literally in front of the steps.

A. I've got no concept of time that night, so, yeah.  Q. Can you describe what conditions were like in the stairwell as you went up between the third, fourth and fifth floors?  A. From what I remember — I think I said we started searching from the third, but I can't remember where we actually started searching, but I know it was about the sixth floor, because you could make out the number in the lobby, that's when it started getting smokier and darker, and then when we got up to the seventh, it was really smoky, and you could sort of make out objects and then —
